

Video: Neanderthal – Comprehension Questions

Directions: On a separate lined piece of paper, answer all of the questions citing information and facts from the video. Take notes first, then go back and write your answer.

1. What kind of life did the Neanderthals live? Explain their culture.
2. Where did the Neanderthals live in the world when they roamed the earth?
3. What do the throat bones tell us about the way Neanderthals might have spoken?
4. How did the geography of the places they lived affect their physical appearance?
5. How were Neanderthals different than Homo Sapiens/Cro-Magnon (us)? Mention the role evolution played.
6. What kind of tools did the Neanderthals make and use?
7. Why and how did the Neanderthals become extinct?
8. Are we (Homo Sapiens/Cro-Magnon) the most advanced species that hominids will ever reach or will we continue to change or evolve? Why or why not?
